

FE Checklist – General

X	<i>Pre-Final Eye Review</i>
	Read Project Instructions in Job Summary
	Read PD instructions --??
	Check Language Style Guide, Client PAQ, and other job-specific instructions/references as necessary
X	<i>TransCheck</i>
	Review TransCheck report on final TXLF
	Mark up comments in the TXLF or deliverable to be sent to linguists after full FE of document(s)
X	<i>First Scan of Document – ON-SCREEN CHECK</i>
	Find/Replace to confirm:
	- Double-spaces have been cleared out (except where used for formatting) - All "Quotation Marks" are curly (find ^34 and replace with ") and come in pairs - All apostrophes ['] are curly (find ^39 and replace with ') - No text is left hidden that shouldn't be, including headers, footers and text boxes
	All links and fields are updated throughout the file (highlight all text and press F9)
	Correct language setting is used on all text, including headers, footers, text boxes
	For English and/or targets in your native language: spell-check is completed
	Insert header/footer per client instructions
	Scroll through document to look for obvious formatting issues or other apparent errors and fix as needed
X	<i>Second Scan of Document – FULL FE comparing target against the source – open on screen <u>AND</u> either printed or saved as PDF</i>
	Acronyms, logos, client-specific terminology match instructions and are consistent within file(s)
	Key areas (such as section titles), headers and footers are read more closely than other body text
	Proper names (e.g., brand names, person names, address names, names of laws/guidelines) handled per style guide and spelled correctly. This is especially important for MT jobs
	Numbers/Dates are appropriate for target language/style guide and consistent throughout document(s)
	Missing or additional text as identified by punctuation or sentence length
	Punctuation and units of measurement are converted properly for target language and consistent throughout document(s)
	All formatting matches the source:
	- Fonts & Styles: bold/italics/underline/highlighting, font style, size and color, superscript/subscript - No corrupted characters, repeated words, punctuation or letters - Capitalization matches source where necessary - Paragraphs: justification, line/paragraph spacing, bullet style - Tables & Cells: spacing and sizing, text positioning - Screenshots and dead text - Automatic fields: table of contents/figures, index, hyperlinks, bookmarks, footnotes, references - PPT slide animations - Page margins are checked to ensure no content is outside of printable margins regardless of the client provided source format. Any concern must be raised to the relevant stakeholder (manager/CS/SAS/Sales).
	Edits are flagged in comments and confirmed with a certified linguist
	All edits made are implemented in both the deliverable and TXLFs. Run a new TransCheck report for each round where edits have been made in the TXLF

X	<i>Machine Translation Post-editing Checks</i>
	Full FE is performed for Full Post-Edit scope. However, punctuation, consistency, and formatting errors are not part of Light PE scope.
X	<i>Cross-File or Language Consistency Checks</i>
	Client-specific instructions are consistent across languages
	Formatting is consistent across languages
	Acronyms/full form handling
	Logos
	Units of measurement conversions
X	<i>Before Delivery</i>
	If extensive edits have been made after the full FE round, or when a PDF is required as a deliverable, save a PDF to confirm on final layout and no corruptions
	Unnecessary comments and tracked changes cleared out, comments drafted by TPT should be free of typos and client-friendly (i.e., avoid internal terms such as 100% match or acronyms, use widely understood terminology)
X	<i>After Delivery</i>
	Perform TM and/or glossary updates where applicable
	Provide feedback to linguists where applicable
	Perform QA processes (such as CRs and PFFs) where applicable
